

WOMEN'S SEXUAL FUNCTION INDEX QUESTIONNAIRE

The Department of Urology and the Department of Psychiatry at Cipto Mangunkusumo General Hospital – Faculty of Medicine, University of Indonesia will conduct a study that aims to obtain an overview of women's sexual function and the factors that influence it.

In this regard, we invite you, women who are married and have had sexual activity in the last 4 weeks (including caressing, foreplay), masturbation, and vaginal intercourse, to participate in this study by filling out a survey. . This survey is conducted in the form of a questionnaire that you can fill out and only takes a maximum of 15 minutes. If you agree, you are requested to be able to directly fill out the questionnaire below.

You have the right to refuse to participate in this research. All research data will be treated confidentially so as not to allow others to be able to link it to you. You can ask questions that are not clear regarding this research by contacting the researcher, dr. Harrina E. Rahardjo, SpU(K), PhD or dr. Saras Serani (081288856098) at the Urology Department or dr. Sylvia Detri Elvira, SpKJ(K) or dr. Ika Nur Fitriana (081310504024) at the Department of Psychiatry, Cipto Mangunkusumo General Hospital.

We thank you for your attention and participation.
